Number of players: 2

Materials:

- 20 word cards
- 2 sheets of drawing paper
- Master Meaning list
- 1 pencil for each player

Directions:

1. Shuffle the word cards and place them faceup in the middle of a table.

2. Together, players separate the word cards by word roots—spect and port—and read the words together. Put the cards aside.

3. At the bottom of one sheet of paper, each player should draw a box large enough to fit a word root. Each player chooses a word root (spect or port) and writes the root of choice within the box.

4. Each player draws a tree leading up from his or her word root box with several branches. Then, without referring to the word cards, players write as many words that contain their chosen roots as they can think of on individual branches. When players have finished, they may look at the word cards and add any words they missed to their trees.

5. Players take turns using the words on their trees in oral sentences and telling what they mean. If players are unsure of the meanings, they may use the Master Meaning list.

6. Players display their word trees and invite classmates to add words to them.
